Summary

M.Tech CSE student at IIT Dharwad with a B.Tech in Computer Engineering (9.24/10) and software development experience in backend systems, distributed systems, and full-stack applications. Strong foundation in C++, Java, Python, data structures, algorithms, operating systems, databases, and computer networks, with hands-on experience building scalable software and automation.

Education

Indian Institute of Technology Dharwad **2026 – 2028**
M.Tech. in Computer Science and Engineering *Ongoing*

MIT Academy of Engineering, Pune **2022 – 2026**
B.Tech. in Computer Engineering ***CGPA: 9.24/10***

Technical Skills

Languages: C++, Java, Python, JavaScript, TypeScript, SQL
Core CS: Data Structures & Algorithms, Operating Systems, Database Systems, Computer Networks, Distributed Systems, System Design
Backend: Node.js, Express.js, Spring Boot, FastAPI, REST APIs
Frontend: React, TypeScript, Vue.js
Databases: PostgreSQL, MySQL, MongoDB, Redis
Systems & Tools: Linux, Git, Docker, CMake, Maven, Netty, Boost.Asio, Protocol Buffers, Prometheus

Work Experience

OSMOS **Jul 2025 – May 2026**
Software Developer Intern – Backend Engineering

- Developed backend services and automation using **Node.js and Python** for an advertising and retail-media platform.
- Developed and maintained Node.js services, Python applications, and recurring processing scripts supporting backend product workflows.
- Worked with **producer-consumer workflows and Kafka-based messaging** for asynchronous backend processing.
- Designed and implemented a **daily vendor-billing workflow** to automate an existing manual monthly billing process.
- Developed configurable billing logic supporting multiple billing types and vendor-specific configurations.

Core-Decimal Solutions **Feb 2025 – Aug 2025**
Software Developer Intern

- Completed project-based software development training using **Vue.js, Express.js, MySQL, and Sequelize ORM**.
- Developed customizable frontend forms and templates with Vue.js and implemented backend APIs using Express.js.
- Designed database models and application mappings using Sequelize and MySQL.

Campus Credential **2024**
Software Development Intern

- Worked on a learning-oriented society-management web application using **React, Node.js, and MySQL**.
- Implemented web application features and backend functionality involving REST-based workflows and relational database operations.

Technical Projects

MiniDB – Distributed Key-Value Database *C++17, Boost.Asio, Protocol Buffers, CMake*
GitHub

- Built a distributed key-value database with **B+ Tree indexing, MVCC transactions, Raft consensus, SQL-like query processing, sharding, and TCP networking**.
- Implemented HTTP monitoring and performance-oriented components, achieving **10,000+ operations/sec** with sub-millisecond local latency.

Blood Connect – Blood Bank Management Platform *React, TypeScript, React Query, Zod*

GitHub

- Built a role-based blood-bank management platform supporting **donor, recipient, and administrator workflows** for requests, inventory, and notifications.
- Implemented **blood-type compatibility matching, location-based donor search, eligibility checks, and emergency request workflows**.
- Structured the application using reusable components, protected routes, service modules, custom hooks, and form validation with React Hook Form and Zod.

KrushiDhan – Agricultural Platform *React, Node.js, Express.js, MongoDB*

GitHub

- Built a full-stack platform integrating agricultural services including **market prices, weather information, government schemes, equipment rental, and marketplace workflows**.
- Developed REST-based application functionality using Node.js, Express.js, MongoDB/Mongoose, and React.
- Implemented application features involving authentication, image uploads, location-based services, and reusable frontend workflows.

Achievements

- **GATE 2026 Qualified:** AIR 3124, GATE Score 601, Computer Science.
- **GATE 2025 Qualified:** AIR 9860, GATE Score 453, Computer Science.
- **First Place – Technodium 25** technical competition.

Certifications

AWS Cloud Practitioner | CCNA | PCAP | NPTEL Modern C++ | NPTEL Data Structures & Algorithms | NPTEL Machine Learning
